Automated Accounting System - Visual Guide

Table of Contents

- 1. Login Screen
- 2. Dashboard
- 3. Orders Management
- 4. Order Creation
- 5. Vendor Operations
- 6. Branch Operations
- 7. Bills & Invoicing
- 8. Stock Management
- 9. Vendors Master Data
- 10. Items Catalog

1. Login Screen

Overview

First screen where users authenticate to the system with username and password.

Features

- Username/email input
- Password field
- Sign In button
- Error message display

Login page - User authentication

2. Dashboard

Overview

Home screen showing operational snapshot with KPIs for the current month.

Key Metrics

- Order Status Breakdown - Orders by status
- Sales Summary - Invoice count and revenue
- Stock Snapshot - Total items and quantity
- Billing by Vendor - Top vendor billing
- Billing by Branch - Top branch billing
- Vendor Operations - Operational KPIs
- Branch Operations - Branch KPIs

Dashboard - Operational snapshot

3. Orders Management

Overview

Central hub for order management with search, filter, and action capabilities.

Features

- Order list with pagination
- Filter by vendor, status, date range
- Order detail panel on selection
- Assign vendor functionality
- Upload vendor PDF
- Capture vendor bill details

Orders list - Browse and manage all orders

4. Order Creation

Overview

Create orders using two modes: upload images (AI parsing) or select from catalog.

Creation Methods

- Image Mode - Upload and OCR parse order sheets
- Item Mode - Select items from catalog

Form Fields

- Customer (Branch) selection
- Company selection (auto-filled)
- Category filter
- Order & Delivery dates
- Image upload area

Order creation form

5. Vendor Operations

Overview

Vendor-centric dashboard with performance metrics, pending orders, and settlement status.

Dashboard Elements

- Vendor summary table with KPIs
- Pending orders count
- Awaiting PDF uploads
- Bill capture status
- Pending bill amounts
- Settlement status (Settled/Open/Overdue)
- Click vendor for detailed drill-down view

Vendor Operations dashboard

6. Branch Operations

Overview

Branch-centric dashboard tracking order pipelines, receivables, and payment health.

Dashboard Elements

- Branch summary table with KPIs
- Pending orders per branch
- Awaiting vendor assignment count
- Open receivable amounts
- Payment collection rate
- Ledger balance
- Settlement status (Settled/Open/Overdue)

Branch Operations dashboard

7. Bills & Invoicing

Overview

Manage customer invoices, create from orders or manually, record payments, download PDFs.

Key Features

- Invoice list with search and filters
- Create from Order (pre-filled) or Manual entry
- GST handling with auto tax template
- Payment recording with allocation
- Overpayment detection
- PDF download of invoices
- Invoice cancellation with cascade

Bills - Invoice management

8. Stock Management

Overview

Real-time inventory tracking with low-stock alerting and threshold management.

Key Features

- Complete item inventory with quantities
- Per-item reorder threshold setting
- Low stock status indicator
- Vendor grouping of inventory
- Summary: total items, qty, low stock count
- Local threshold storage (per-device)

Stock - Inventory monitoring

9. Vendors Master Data

Overview

Supplier management with contact info, payment terms, and invoice template setup.

Key Features

- Vendor list with search
- Create/edit vendor records
- Contact information
- Payment terms and credit days
- Invoice template management
- Link vendors to items and orders

Vendors - Supplier master data

10. Items Catalog

Overview

Central product catalog with pricing, GST rates, and vendor associations.

Key Features

- Item code, name, description
- Category assignment
- Cost and sell rates
- GST rate configuration
- Vendor association
- Search and filter by category/vendor
- Create/edit items

Items - Product catalog

End-to-End Workflows

Workflow 1: Order to Invoice to Payment

- Create Order (Orders > Create Order)
- Manage Order (Assign Vendor > Upload PDF > Capture Bill)
- Create Invoice (Bills > Create Invoice > Select Order)
- Record Payment (Bills > Payment > Select Invoice > Submit)

Workflow 2: Monitor Vendor Health

- View Vendor Summary (Operations > Vendor Ops)
- Click Vendor for Details (Drill-down view)
- Review KPIs, Orders, Ledger
- Export Ledger to CSV

Workflow 3: Track Branch Receivables

- View Branch Summary (Operations > Branch Ops)
- Click Branch for Details (Drill-down view)
- Review Pending Orders, Payment Rate
- Check Overdue Invoices & Exceptions
